Subject: Sculpture Installation

Dear Charlie:

This letter confirms our review of the proposed "bike wheel" sculpture installation on to the existing masonry façade of the Dragon Pizza restaurant located at the above referenced address. The proposed schematic and mounting diagram of the lightweight sculpture is shown on the attached sketches.

The general intent of the installation is to fasten bike wheels (3 pounds maximum) to the brick masonry façade of the single-story building. The sculpture will wrap around the corner of Grove & Elm Street, which is where the restaurant is located.

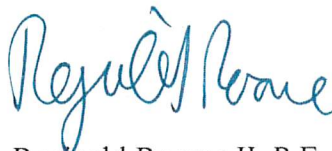

The bike wheels will be supported by stainless steel eye bolts that will be connected to ¼" diameter masonry anchors that are in turn fastened to the brick with masonry bonding cement. We find this design to be more than adequate to resist the applied loads, while not adversely affecting the existing buildings structural integrity.

Should you have any questions or require further assistance, please feel free to call us.

Very Truly Yours,
ROOME & GUARRACINO, LLC
