### Bonding

7. Mayor's Request (ID # [23-0049](#)) Requesting authorization to borrow \$4,545,827 in a bond, and to appropriate the same amount for streets and sidewalk reconstruction.

Director Postlewaite said that the recently completed 3-year pavement analysis indicates that the condition of the city's pavement is improving, with less than 50% of the streets categorized as being in 'poor' or 'less than poor' condition. The primary goal of the project is traffic calming and safety, and ADA accessibility. The complete streets component this year is West Washington Street and will include the completion of the Holland/College project. The scope of roadway paving has been reduced to one street, (Meacham Road), however the sidewalk component has been increased to improve the quality of ADA accessible curb ramps.

A strip of brick sidewalk will be reconstructed in Davis Square this year, extending its width beyond 5 feet. Because of the intricacies of the design and execution, adjustments may be made on a building by building basis. Council Pineda Neufeld asked if the Davis Square work will coincide with the re-signalization of Davis Square and Director Postlewaite confirmed that it would be coordinated. In other parts of the city, three raised crossing intersections will be built. Councilor Scott asked about speed humps and Director Postlewaite replied that their locations have not yet been decided upon. Director Postlewaite noted that the city is being aggressive this year and will be requesting more funding than in prior years. There are four funding streams being utilized, including excess funds from the Engineering Department's prior fiscal year budget. Director Richards explained that if there are remaining funds on a project, they would be applied to future projects.

Chair Wilson asked that a simple explanation of how streets are selected for upgrade be posted on the department's website. Functional classifications are used to order the streets for repair. Sidewalk data is also analyzed along with transit data, proximity to schools, etc. to develop a priority list for reconstruction. Council Pineda Neufeld inquired if the sidewalk reconstruction list could be shared and Director Postlewaite replied that the data is in the GIS database and could be shared on a general level by creating color coded maps, similar to what was in the presentation this evening. Councilor Kelly asked about the timeline for FY-23 items and Director Postlewaite explained that the larger projects are labeled in the year that they're bid, but the actual time to completion could take 2 years. Councilor Kelly also asked how much has been typically bonded for these types of projects and Director Richards explained that the budget has

increased by 4.5% to account for increased costs, but since 2021, that increase has risen to 10% per year. Councilor Clingan asked how much it would cost to upgrade 5% of the city’s streets and Director Postlewaite postulated that it might be as high as \$3-4 million just to pave streets, however it would be difficult to secure contractors to do the work. Councilor Scott commented that Cambridge has been having some problems with the quality of concrete used for sidewalk repairs and he asked how Somerville would mitigate those issues should they occur. Director Postlewaite said that there aren’t that many issues, but when it happens, the panels are removed and replaced.

Commissioner Lathan explained that the majority of invoices are due to purchase orders being closed prematurely and invoices that were received late by the city. She explained how the purchase order system works and how some of purchase orders could get closed early. Chair Wilson asked if there might be an inter-departmental system that could be used for invoice tracking. Councilor Scott asked about a \$4,000 invoice for a hand hole service that he thinks could have been performed in-house by DPW staff and Superintendent Barbieri replied that DPW staff is not trained to perform that work. Councilor Scott also asked for additional details for invoice #2880 for work done on Allen Street.
