**198429: Requesting the adoption of a New Zoning Ordinance (updated) to supersede the current Zoning Ordinance as originally adopted on March 23, 1990.**

Alderman White spoke about state legislation that could impact the city's zoning and suggested holding off until the legislature acts. Mr. Proakis explained that most of the state's actions deal with suburban housing and he assured the committee that the situation is being monitored. Mr. Proakis said that the best way to create a sustainable community is through walkable, mixed use and transit oriented development. He spoke about a vulnerability study and a climate change plan and said that the city's municipal code must coincide with the state's building codes. Alderman Rossetti inquired if the ZBA or the Planning Board could make sustainability conditions and was informed that they could not be in the zoning but could be included in special permit conditions. Performance standards are also an option.

Mr. Proakis also discussed the challenges presented by the city's current housing stock, site landscaping, green area ratio (GAR), urban agriculture, green roofs, electrical codes, solar energy, what makes zoning work and how GAR is used in Washington. Mr Proakis will generate some examples for the Board of Aldermen. Alderman White spoke about zoning out big box stores and large parking areas and would like to balance green roofs and green space on the ground. Alderman Heuston discussed harvesting storm water for the city's irrigation needs.

Micro grids were discussed along with the possibility of selling power from solar panels to one's neighbor. Permeable surfaces were discussed as well as storm water management. Alderman Heuston feels it is important to regulate properties after the development to make sure permeable surfaces regulations are adhered to, noting that Target repaved its parking lot without a permit from the city. She feels that the city's inspector should be in the field more often. Alderman Ballantyne spoke about heat islands.

Mr. Proakis spoke about the dangers associated with having housing close to a highway, e.g., exposure to ultra fine particulates from traffic. Alderman Rossetti explained how the airport studies tie into the traffic pollution. Members also discussed the Somerville Housing Authority's duty to meet safety standards for air quality.
