7. COMMUNICATIONS OF THE MAYOR

7.1. Mayor's Request (ID # 25-1606)

Requesting authorization to enter into a Tax Increment Financing Agreement with a full building occupant of a laboratory building.

Mayor Ballantyne addressed the Council and said that the city is aiming to bring TransMedics (TMDX) to the city. TransMedics needs a larger facility to accommodate their expansion plans and is considering other locations besides Somerville. The Mayor commented that the city will be facing a deficit in coming years due to federal funding cuts and having TransMedics move its operations here would fill an entire building that is currently vacant and ensure high quality jobs for the area. TransMedics is the largest life sciences movement in the region, and they share the city's ideals. The Mayor told members that the structure of the package is sound and that this proposal would yield benefits for the city. Should TransMedics select Somerville as its new site, this agreement would need to be in place for them to move forward.

Representatives from TransMedics, Chief Financial Officer Gerardo Hernandez Omana, Senior Vice President of Supply Chain & Operations Nick Corcoran, and Chief of Cardiothoracic Programs Farhan Zafar addressed the Council and explained what the company does. Founded in Andover in 1998, TransMedics operates an Organ Care System that was invented by their Chief Executive Officer. The company saw shortcoming in the organ transport process and launched an improved system, the National Organ Care System (OCS) Program (NOP), a complete, esnd-to-end donor organ retrieval and clinical management service that successfully executes procuring and delivering healthy donor organs from anywhere in the United States on-demand to transplant centers through a network of 18 clinical and surgical hubs across the nation. The system can track and manage organs, i.e., keep them alive outside of the human body, from donation to transplantation. The company has a dedicated fleet of 22 jets positioned around the country which makes it possible to increase the number of transplants performed as well as increasing their outcomes. For the company to increase its volume, it needs a larger space.

Rachel Nadkarni, Director of Economic Development, explained the details of the Tax Increment Financing (TIF) agreement and told the Council that the agreement that is being negotiated is for 10 years, which is a common term for such agreements. Should TransMedics move to Somerville, 500,000 square feet of lab space will be removed from the market. The company presently employs 300 people and will be adding another 600 jobs to their workforce. In addition to providing these jobs, the presence of TransMedics would reinforce Somerville's vision of becoming an emerging destination for life-science and healthcare innovation, create economic growth by driving meaningful economic activity and local spending at local businesses, and strengthen the city's commercial ecosystem.

Chief Assessor requesting to appear at this Council's November 13, 2025 meeting for the Tax Classification Public Hearing and the determination and adoption of tax levy percentages for FY 2026.

RESULT: **APPROVED**

8.2. Officer's Communication (ID # 25-1607)

Executive Director of the Office of Strategic Planning and Community Development conveying a summary of the 90 Washington process review and development objectives.

This item was discussed with items #25-1594, #25-1595 and #25-1596.

Office of Strategic Planning and Community Development (OSPCD) Senior Planner Ben Demers gave a presentation explaining the guiding documents, high level goals, development and minor changes to the plan. The site in question is a 4-acre parcel which was taken by the Somerville Redevelopment Authority (SRA) in 2019. The original price paid by the SRA was $9 million, however the seller sued and was awarded another $30

million.
Mr. Demers explained that the scope of the project has changed to eliminate the public safety complex, and he outlined steps yet to be performed. The project delineation and design (phase 3) are ongoing and will include public engagement. Phase 4 will be the selection of a developer and issuance of a request for proposals (RFP), and phase 5 will be project implementation. Mr. Demers noted that a requirement will be that the project would need to break ground within 3 years of the land transfer.
The proposed changes were introduced and included the removal of the public safety component from the plan and recouping money from sale of the land (to offset the additional $30 million paid to the seller), replacing the Technical Advisory Committee with the Civic Advisory Committee, and lengthening the time for developers to break ground.
Mr. Demers listed the development objectives and uses as:

- recouping a significant portion of funds paid for the taking of 90 Washington Street,
- achieving a combination of some or all the following land uses: new housing, new commercial space, new civic space and green space,
- meeting the following development principles: mixed-use building formats, dense development, flexibility in form or massing,
- meeting the following development principles: sustainable design, no surface parking, robust urban canopy and natural landscape, and
- having diversity, equity, and inclusion in the development process

Councilor McLaughlin informed the Council that there will be a public hearing regarding 90 Washington Street in the Land Use Committee on November 6, 2025, at 6:30 P.M.

8.3. Officer's Communication (ID # 25-1451)

Director of Infrastructure and Asset Management conveying the draft Combined Sewer Overflow Plan.

Director of Infrastructure and Asset Management Rich Raiche spoke on the item, saying that Somerville, along with Cambridge and the Massachusetts Water Resources Authority (MWRA), are responsible for drafting and executing a plan for a combined sewer overflow. Work on a plan began in 2022 and a draft of that plan must be submitted to the Environmental Protection Agency (EPA) by the end of this year. Approval is anticipated during 2026 with construction commencing in 2027.
Director Raiche reviewed a number of slides and spoke about the city’s legal and moral obligations and presented a high-level summary of the processes and conclusions, to date, and said that 39 alternative projects were considered, with the overall conclusion being that a full-scale separation is not recommended at this time due to downstream and space constraints.

He spoke about the projected financial impact and Financial Capability Assessment and noted that the provisional bill impacts show a 208% increase from FY 2026 to FY2 055. Regarding the FY 2027 Water and Sewer rates, the director spoke about a long-term Capital Investment Plan, future revenue requirements, enterprise fund health, maintaining financial metrics, raising rates early to cash-fund future projects and preparing for annual rate increases of 15% to 20% for next 4 to 5 years.

Director Raiche touched on the planning process which includes community outreach and engagement and public meetings on the Combined Sewer Overflow Plan.

In closing, Director Raiche told the councilors that the Infrastructure and Asset Management Department would like a sense of the Council's position on the plan. While Council approval is not required for the plan itself, the Council will be responsible for approving the necessary rate changes to fund the work articulated in the plan. The EPA has determined that increasing rates will not create a sufficient hardship for the city to make any subsidies available.
