BUSINESS LICENSE APPLICATION - Small Wireless Facility

File #: 21-001931

License #: BL21-000022

Address: 42 BOW ST

Licensee: Derek Maheux Centerline Communications

DBA Name: Verizon Wireless

Business Ownership Type: Partnership / LLP

Legal Name of Entity: Cellco Partnership d/b/a Verizon Wireless

Owners/Officers: , , ,

License Information:

Do you believe this to be a 6409(a) application?: Don't Know

Describe the reason for the work, and the intended beneficiaries: The proposed small cell installation will enhance network capacity and coverage and bring improved wireless service to Somerville and the immediately surrounding area.

Provide the detailed description of the work that should appear on the License: Proposed installation of a small cell wireless facility on an existing Eversource utility pole

of installations on existing poles: 1

of installations on new poles: 0

Provide the legal name of the entity that will own the License: Cellco Partnership d/b/a Verizon Wireless

Approval Conditions:

Approved By:

Hans Jensen, Approved

Karla Cuarezma, Approved

Malik Drayton, Approved with Conditions

APPROVAL CONDITION: MD20210225: Contractor shall take all necessary precautions to avoid damaging any tree or tree part with equipment.

APPROVAL CONDITION: MD20210225: All nearby street tree(s) shall be protected prior to and during all construction activities using TREE BOX or TREE WRAPS. . TREE BOX shall be constructed from 2 in. x 4 in. lumber creating a box around the border of the tree pit with 2 in. x 4 in. lumber standing straight up at the corners and wrapped with orange snow fence. Detail attached. . TREE WRAPS

(TREE TRUNK WRAPPING PROTECTION LUMBER) shall consist of 2 in. x 4 in. and 8 ft. height lumber wired together in close spacing with zip ties or 16 gauge galvanized steel wire to form a protective enclosure around tree trunks. Use burlap to separate the wood from the bark if necessary to prevent wood from scraping or bruising bark. Do not use staples or puncture the trunk in any way.

APPROVAL CONDITION: MD20210225: Any tree roots less than two (2) inches in diameter that cannot be avoided during construction shall be carefully and cleanly cut with a clean pair of pruning shears or loppers. Roots are to be cut back flush with the edge of the trench. If any tree roots greater than two (2) inches in diameter are encountered, stop work immediately and contact the City Urban Forester. Any and all pruning of roots greater than 2 inches in diameter must be completed under the supervision of the City Urban Forester.

John Power, Approved with Conditions

Electrical Review approved, conditional upon electrical permit application/approval for scope of work.

City of Somerville City Council
c/o City Clerk's Office
93 Highland Avenue
Somerville, MA 02143

Re: Verizon Application for Small Wireless Facilities ("SWF")

Dear City Clerk and City Council Members:

Enclosed please find the application of Cellco Partnership d/b/a Verizon Wireless ("Verizon") for approval to install SWF on existing wooden utility poles within Somerville's public right of way at the following locations:

Site Name	Address	Pole #
BOS_SOM_032_MA	299 Medford Street	unmarked
BOS_SOM_034_MA	434 McGrath Highway	unmarked
BOS_SOM_060_MA	53 Concord Avenue	112/3
BOS_SOM_061_MA	40 Marion Street	221/5
BOS_SOM_072_MA	15 Ivaloo Street	BECO1179/ VZ179/1
BOS_SOM_076_MA	2 Belmont Street	unmarked
BOS_SOM_086_MA	40 Bow Street	unmarked

Consistent with the City Clerk's proposed fees for a SWF license approved by the City Council on July 11, 2019, Verizon shall submit a New License Fee of \$100.00 per installation upon approval of each location included in the application. Under the City's Ordinance Relative to Small Wireless Facilities in the Public Rights-of-Way ("Ordinance"), Section 12-144(a), no public hearing is required.

Included within the application are a set of plans for each proposed location along with a structural analysis for each existing utility pole as well as a license granted from the pole owner (Eversource) to Verizon to install the SWF at each proposed location. Additionally, we have included a compliance letter along with a diagram which shows that each proposed antenna array is more than fifteen (15) feet from a residence's window, door opening, porch or balcony as required by the City's Design Standards for Small Wireless Facilities Placement in the Public Right-of-Way ("Design Standards"). Further, as described in detail below, Verizon respectfully requests a waiver of two (2) dimensional requirements in the Ordinance that materially inhibit Verizon's ability to provide 5G services in Somerville.

Request For Waiver

Under the City's Design Standards, an applicant may request a waiver of any of the requirements in the Ordinance or Design Standards as long as the applicant "specif[ies] those provisions for which it seeks a waiver, and . . . include[s] specific explanations as to the need for waiver of each, including an explanation of why compliance with the requirement(s) would prohibit or effectively prohibit the provision of services as protected by applicable law." This provision acts as a "safety valve" that recognizes that advanced network equipment, including the equipment used for

5G, is evolving and subject to changes over time. Without this safety valve, restrictive dimensional requirements would act as an effective prohibition of wireless services in violation of Federal Communications Commission requirements.

- Waiver Request #1: Verizon requests that the City waive the requirement in Section 12-148(e) of the Ordinance that requires that “antennas shall be limited to snug-mount, canister-mount, and concealed . . . with a diameter of no more than six inches greater than the diameter of the [top of the] pole.” It is not technically feasible to comply with the canister requirement because use of such a canister would make the antenna ineffective. Simply put, while Verizon’s 5G antennas meet the “snug-mount” requirement, the antennas are not able to be located within canisters. Unlike 4G antennas, which are often referred to as “cantennas” due to their shape, Verizon’s panel 5G antennas are not contained within canisters. Each individual antenna in the array has a height of 19.3”, width of 11” and depth of 7.9”. It is important to note that even if Verizon were able to deploy such a canister around the antenna array, the size of the resulting structure would exceed the 3 cubic foot requirement called for in the Ordinance. Additionally, a canister surrounding the antenna array could potentially interfere with transmission of Ultra-Wide-Band (UWB) 5G signals which can be blocked by nearby surfaces.

Similarly, the 5G equipment being proposed by Verizon slightly exceeds the requirement that a pole-top antenna diameter be no more than 6” greater the diameter of the top of the pole. The Verizon 5G equipment exceeds the pole top diameter by approximately 8” rather 6”. This minor exception is warranted because the overall design proposed by Verizon (that does not include a canister) also eliminates the need to install fan that is required for cooling the equipment that is in a canister. The use of fans, and the resulting noise from the fans, is discouraged by the Ordinance in residential areas. In fact, the use of fans and their noise was a big part of the discussion when the City Council was developing the Ordinance. Finally, the small increase of diameter in array allows for the proper promulgation of the UWB 5G signal unique to the Verizon UWB 5G service. Attached to this letter is a diagram showing the proposed 5G SWF antenna array in detail. This design is used by Verizon in all Massachusetts 5G communities, including Boston, Arlington, Malden and Cambridge.

- Waiver Request #2: Verizon requests that the City waive the requirement in Section 12-148(d) of the Ordinance that requires that “[p]ole-mounted equipment minimum heights to the bottom of the equipment shall be 15 feet above sidewalk elevation.” As shown in the detailed plans included with this application, the lowest piece of equipment associated with the SWF facility (i.e., the “load center”) is located at a height of 10 feet above sidewalk elevation. It is not technically feasible to locate the load center at 15 feet height or higher because it is the utility pole owner (in this case, Eversource), that establishes SWF equipment height based on the electrical equipment and other attachments already on the pole. Moreover, the load center (also known as a “disconnect box”) contains the switch that can be accessed by emergency personnel to shut off power to the antenna in an emergency and must be able to be accessed by emergency personnel. In discussions with City personnel on September 22, 2020 and October 6, 2020, it is Verizon’s understanding that the City is in agreement with this waiver request.

Taken as a whole, Verizon’s waiver requests allow for the use of smaller equipment that will emit less noise because it eliminates the need for fans and uses existing utility poles for the placement of 5G equipment. All of these benefits are part of the language and intent of the Ordinance and Design Standards. Without granting of these waiver requests, Verizon’s ability to provide 5G in Somerville would be materially inhibited and would constitute an effective prohibition. For all these reasons, Verizon respectfully requests that the City grant its waiver requests and approve the SWF applications contained herein.

Respectfully Submitted,

Sean Conway

SCOPE OF WORK:

Hudson Design Group LLC (HDG) has been authorized by Verizon to conduct a structural evaluation of the existing utility pole supporting the proposed Verizon equipment.

This report represents this office's findings, conclusions and recommendations pertaining to the support of the proposed Verizon equipment listed below.

This office conducted an on-site visual survey of the above areas on May 18, 2020. Attendees included Patrick Barrett (HDG – Field Technician).

CONCLUSION SUMMARY:

Based on our evaluation, we have determined that the existing pole **is in conformance** with the National Electric Safety Code 2017 (NESC). The utility pole structure is rated at 86.2%.

APPURTENANCES CONFIGURATION:

Appurtenances	Elev.	Mount
(3) Typical Antennas	35'-2"	Top of Wood Pole
(1) Demarc Box	18'-0"	Side of Wood Pole
(1) Load Center	9'-0"	Side of Wood Pole

ANALYSIS RESULTS SUMMARY:

Component	Max. Stress Ratio	Elev. of Component (ft.)	Pass/Fail
SYP 3 (Existing)	86.2%	0 – 33.9	PASS

DESIGN CRITERIA:

National Electric Safety Code 2017 (NESC) and the Massachusetts State Building Code 9 th Edition.

Radial Ice Thickness:	0.50 in	NESC Table 230-1

1. Approximate height above grade to center of the proposed Antenna: 35'-2" +/-

***Calculations and referenced documents are attached.**

HUDSON
Design Group LLC

EXISTING STRUCTURE:

The existing 33'-11" +/- wood pole is assumed to be Southern Yellow Pine Class 3 (Fb=8000 psi) with a 12.0" diameter base. If field conditions differ from what is assumed in this report, then the engineer of record is to be notified as soon as possible.

ANTENNA SUPPORT RECOMMENDATIONS:

The new antennas are proposed to be installed on a top mounting kit secured to the wood pole using thru bolts.

EQUIPMENT SUPPORT RECOMMENDATIONS:

The new equipment is proposed to be installed on the wood pole using the approved manufacturer's mounts.

Limitations and assumptions:

1. Reference the latest HDG construction drawings for all the equipment locations details.
2. Mount all equipment per manufacturer's specifications.
3. All structural members and their connections are assumed to be in good condition and are free from defects with no deterioration to its member capacities. Contractor to perform pre-inspection prior to construction.
4. All antennas and waveguide cables are assumed to be properly installed and supported as per the manufacturer requirements.
5. HDG is not responsible for any modifications completed prior to and hereafter which HDG was not directly involved.
6. If field conditions differ from what is assumed in this report, then the engineer of record is to be notified as soon as possible.
7. HDG did not perform any geotechnical analysis / or / investigation. Soil Information is unknown.
