

Nicholas Anthony Cantone

WORK EXPERIENCE

Nicholas Cantone Carpentry, Somerville, MA November 2021 – Present

Owner / Operator: Owner of full service contracting and construction company.

Currently accepting both sub-contracted as well as solicited jobs. As with my entire career, I am involved in every aspect of home building, construction and remodeling to include blueprint reading, framing, siding, window and door installation, cabinetry, tiling, roofing, insulation, demolition and finish carpentry. I have developed interpersonal skills, communication skills, excellent mathematical skills, analytical skills, as well as the ability to understand verbal and written instructions. I am also solely responsible for stakeholder team interaction and customer satisfaction.

International Brotherhood of Teamsters, Local No. 25, Boston, MA August 2022 – Present

Laborer: I am currently employed at the Boston Convention & Exhibition Center as well as the Hynes Convention Center, part time. When I work, I am tasked with assembly and disassembly of all aspects of the specific convention.

ANB Construction, Saugus, MA March 2012 – November 2021

Carpenter Supervisor: Daily supervision of apprentice construction workers as well as unsupervised decision-making control at job sites. This includes control of how, when and whom shall address customer concerns and requests. I was fully in control of all aspects of home building using the skills I developed and outline above.

Carpenter's Apprentice (unpaid): Duties include daily maintenance of job sites, problem solving for construction jobs and scheduling. Additional duties included those as prescribed by job general contractor to include other aspects of home construction and routine daily requirements. I learned to take direction as well as how to work independently.

EDUCATION

Mass Hoisting Training, Inc., Plymouth, MA

Hoisting Engineer License Preparation Course, Active

Obtained: January 2023

Class prepared students for the Massachusetts Hoisting Engineer License exam. This was done using classroom instruction related to OSHA guidelines and regulations as well as Massachusetts General Law. The intent was to provide a sound knowledge base regarding both proper and safe usage of forklifts as well as telescopic booms.

Construction Certificate Institute, Medford, MA

Construction Supervisor License Preparation Course, Active

Obtained: May 2015

Class prepared students for the Construction Supervisor License exam. This was done using the International Building Codes as well as the International Residential Codes. Classwork stressed individual problem solving using existing international recognized codes as well as OSHA regulations. This license is renewed every two years.

Everett High School, Everett, MA

Building Technology Program, May 2005

Program consisted of a High School diploma curriculum with a concentration in carpentry. This focused skills necessary for every aspect of home building and basic construction jobs.
