General Notes:

- Design is based on a 115 mph, 3 second gust wind design per IBC 2015 (ASCE 7-10), Category II, Exposure C, Components and Cladding Zone 5.
- No additional wind catching surfaces are added to the building structure. The customer's building engineer is to determine the adequacy of the supporting structure.
- Extruded aluminum shapes shall be 6061-T6 alloy. Aluminum sheet shall be 3003-H14 alloy. Aluminum plate shall be 5052-H34 alloy.
- All welds shall be made using 5356 filler for aluminum by persons qualified in accordance with AWS standards within the past two years.
- All fasteners shall be stainless steel or zinc coated to prevent corrosion.
- All wall penetrations shall be sealed to prevent water penetration.
- J.P. Morgan Chase will not be responsible for the safety on this job site before, during or after installation of this structure. It is the responsibility of the contractors and installers to ensure that the installation and erection of this structure is performed using methods that are in full compliance with OSHA regulations.
- Any deviation from this design or from any part of this drawing, including the General Notes, without prior written consent from J.P. Morgan Chase voids this drawing in its entirety.
- The structure designed on this drawing is prototypical and should not be used for site specific applications unless deemed suitable by a Competent Professional Engineer.

Note: This sign is intended to be installed in accordance with the requirements of Article 600 of the National Electrical Code and/or other applicable local codes. This includes proper grounding and bonding of the sign.
