4.9. Resolution
(ID # [26-0482](#))

By Councilor Clingan

That the Director of Water and Sewer appear before the Committee on Sustainability and Infrastructure to discuss the process by which it is determined whether a residential unit requires a 1-inch water meter or a 5/8-inch water meter.

Councilor Clingan explained that the city has two base rates for water usage, based on the size of the pipes, in other words , 5/8” vs. 1”. He noted that in some installations, consumers were asked which size pipe they preferred or were advised that the smaller pipe would be sufficient for their needs, thereby saving them approximately \$350 in base rate fees. He would like to know the criteria for determining which size pipe is installed and how the confusion can be avoided in the future.
